- Linux Environments

Career Objectives

Aspiring to work in a growth and complete oriented environment or institution, I would like to fully contribute to something that will make a great impact and make life easier to some degree.

Strategic Software Engineer skilled in application development, testing and optimization. Excels at coordinating ground-up planning, programming and implementation for core modules. Maintains strong object-oriented and software architecture fundamentals. Versatile Software Developer equally comfortable creating solutions for on-premise or cloud-based deployments. Exploits agile development methodologies to rapidly iterate and improve products. Consistent provider of useful and actionable input on all projects. Highly-motivated employee with desire to take on new challenges. Strong work ethic, adaptability and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills.
